PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building scalable, secure, responsive web applications across frontend and backend layers using React.js, JavaScript, HTML5, CSS3, Python/Django, Flask, and RESTful APIs. Skilled in relational and NoSQL database design, authentication, authorization, validation, and writing clean, reusable, maintainable code. Strong in debugging, performance optimization, Git workflows, and SDLC best practices.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript (ES6+), SQL, C++, C, Java
- **Frontend Technologies:** React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Web Design, Reusable Components
- **Backend & Web Development:** Python/Django, Flask, RESTful API Development, Third-Party API Integration, CRUD Operations, Authentication & Authorization, Input Validation, Security Best Practices, MVC/MVT Architecture
- **Databases:** MySQL, SQLite (Relational), MongoDB (NoSQL), Database Design & Query Optimization
- **Tools, Cloud & Deployment:** Git, GitHub, VS Code, Linux, AWS (EC2, S3), Docker & Containerization, CI/CD Pipelines
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Debugging, Performance Optimization, Scalability, SDLC, Coding Best Practices
- **AI & Emerging Technologies:** Machine Learning, Generative AI, RAG, Prompt Engineering, OpenCV

PROFESSIONAL EXPERIENCE

Full Stack Intern | Emdata Networks Private Limited, Bangalore

May 2026 – Present

- Developed and maintained full-stack web applications using Python/Django, React, HTML5, CSS3, Bootstrap, and JavaScript (ES6+), building responsive, user-friendly interfaces with reusable components.
- Built RESTful APIs and backend business logic covering CRUD operations, authentication, authorization, and input validation, integrating frontend with backend services and validating endpoints.
- Designed relational database schemas, optimized SQL queries for performance, and implemented Django's MVT architecture; debugged and resolved application issues while following clean-code and Git version-control workflows.

AI & Cloud Computing Intern (Virtual) | SuprMentor

Jan 2026 – Apr 2026

- Developed a Flask-based authentication system implementing session management and bcrypt password hashing, applying security best practices for secure user authentication and authorization.
- Built a Smart Document Analyzer integrating third-party APIs with Retrieval-Augmented Generation (RAG) and semantic search, applying debugging, testing, and Git/GitHub version-control practices throughout the development lifecycle.

PROJECTS

Online Grocery E-Commerce Platform – SalamMart

- Built and deployed a full-stack, scalable grocery e-commerce platform with three role-based modules (Customer, Staff, Owner/Admin) using Python/Django MVT architecture and Django ORM with a normalized relational database design.
- Implemented authentication, role-based authorization, form validation, and CSRF protection across all three roles, applying application security best practices and access control.
- Developed backend business logic for core commerce workflows — product search/filtering, wishlist, cart, pincode-based delivery checks, checkout, and order placement with lifecycle handling and automatic stock restoration on cancellation.
- Built owner/admin and staff dashboards for catalog, order, user, and stock management, and delivered a responsive, mobile-friendly customer UI with a reusable CSS component system.

Tech Stack: Python, Django, SQLite, HTML5, CSS3, JavaScript

Salon Appointment Booking Platform

- Developed a responsive appointment booking platform with scheduling and admin management, integrating React components with backend services and a MongoDB (NoSQL) database.

Tech Skills: React.js, JavaScript, MongoDB

Food Waste Management E-Commerce Platform

- Developed an e-commerce platform enabling restaurants to sell surplus food online, with responsive interfaces and MySQL-backed server-side functionality.

Tech Skills: HTML, CSS, JavaScript, MySQL

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals – Microsoft (Jan 2026)
- Building LLM Applications with Prompt Engineering – NVIDIA (Aug 2025)
- Data Visualisation: Empowering Business with Effective Insights – Tata Group / Forage (Apr 2025)
- Rapid Development for AI Services – Eitran (Dec 2024)

EDUCATION

B.E. in Information Science and Engineering

2022 – 2026

Yenepoya Institute of Technology, Mangalore, Karnataka – Affiliated to VTU
